B2 Theory

Falcon 900 (Honeywell TFE731) (SPZ 8000)

B2 Practical

This CASA Differences course offers a sharply focused, detail-oriented comparison of similar aircraft models that require separate type ratings. The focus is on the systems that are significantly different between two aircraft models that otherwise share a large portion of other main systems in common.

The emphasis is on building upon what the student already knows about a particular aircraft model and filling the gaps relating to the new model.

B1+B2 Practical differences training focuses on the applied learning aspect on a wide range of airframe, engine, and avionics topics. It is intended as a continuation and enhancement of a quality B1 Theoretical course.
