

# B O M B A R D I E R

Course Length  
5 Days (40 Hours)

## Global 5000 GVFD / Global 6000 Aircraft

### Line Maintenance

The line maintenance course is a condensed, 5-day session. It enables technicians to understand aircraft systems and servicing with an emphasis on practical experience to build aircraft maintenance skills.

Moderate troubleshooting is stressed and reinforced with hands-on sessions on available aircraft. Active student participation provides a better understanding of aircraft systems, leading to effective and efficient maintenance practices.

For operations with technician scheduling and cost limitations, this Global 5000 GVFD / Global 6000 class creates a highly productive solution.
