Phenom 300 Garmin 3000 Interface

Avionics Maintenance

This 3-day Phenom 300 Garmin 5000 Interface course provides access to Garmin's desktop simulators to allow users to adjust settings and configurations to emulate the customer's own aircraft requirements. Technicians will gain valuable hands-on experience with the simulation of factory equipment (operational functions, system controls, interface screens, and messages). This also reduces time to learn actual, installed systems, while reducing the risk of potential damage to Garmin aircraft production system components and integrated airframe equipment.

With the added benefit of Garmin desktop equipment, aircraft technicians may now improve their proficiency on these leading-edge avionics systems being installed or retrofitted into many business aircraft.

**Course Length
3 Days (24 Hours)**

FAA IA Approval Code:

C-IND-IM-170928-K-010-003
