This training course is designed to introduce non-technical personnel to the aviation industry. It is ideal for all those seeking a better understanding of the aviation business, including accountants, administrative assistants, office personnel, and others connected with aviation.

During the 8-hour course, you will be given the basic knowledge and understanding of aircraft operations, maintenance, and industry rules and regulations, while also learning a brief history of aviation itself. As a handy reference tool, we will also provide a complete list of the popular business aviation models and their specifications.

Gain new understanding and insights to assist you in your aviation career:

- Abbreviations & acronyms
- Business aviation (history)
- Basic aircraft fundamentals
- Flight operations
- Maintenance operations
- Aircraft manufacturers and specifications
