TC Approved:

Beechjet 400XT/XTi Nextant Initial Maintenance Course with Williams FJ44-3AP engines

This course offers a sharply focused, detail-oriented comparison of similar aircraft models that require separate type ratings. The focus is on the systems that are significantly different between two aircraft models that otherwise share a large portion of other main systems in common.

The emphasis is on building upon what the student already knows about a particular aircraft model and filling the gaps relating to the new model.

This comprehensive class is the ideal way to introduce technicians to the aircraft within the fleet.
