Starting (80)	3.5
TOTAL	24

This specific-focus maintenance course is a condensed, 3-day session enabling technicians to understand aircraft powerplant and propulsion systems and servicing with an emphasis on practical experience to build aircraft maintenance skills.

Moderate troubleshooting is stressed and reinforced with actual hands-on sessions on available aircraft. Active student participation provides a better understanding of aircraft systems and effective maintenance practices.

Students completing this course will extend their skills and value to the operations team.
