TC Approved:

Lear 31/31A Initial Maintenance Course with Honeywell TFE731 engines Aircraft

This course offers a sharply focused, detail-oriented comparison of similar aircraft models that require separate type ratings. The focus is on the systems that are significantly different between two aircraft models that otherwise share a large portion of other main systems in common.

The emphasis is on building upon what the student already knows about a particular aircraft model and filling the gaps relating to the new model.

This comprehensive class is the ideal way to introduce technicians to the aircraft within the fleet.
